

Composition

Basing on the picture, the student must choose a topic and write a composition. For example, if the picture is about domestic violence, the student may write about domestic violence in his/her Country.

Description:

- (Introduction) First, the student should make a contextualization of the topic and present his/her point of view in relation to the topic presented on picture.
- (Body) Second, the student should write the development of the story. In this section, the student may write about everything related to the topic in his/her country. Remember that each idea should be put in its own paragraph. (If you need clarification, contact the teacher).
- (Conclusion) Last but not the least, the student should write the conclusion. Here the student makes a brief summary (few words/sentences) and offer pieces of advice.
